

Calling all STEMM experts! Mentors sought for a unique program: Become part of the dynamic international community of Global Talent Mentoring!

Are you a scientist, engineer, mathematician, IT expert, or other practicing specialist in science, technology, engineering, mathematics, and medical sciences (STEMM)? Would you like to support highly talented, motivated, youths by sharing your expertise and experience with them? Then join the international community of STEMM experts and young STEMM enthusiasts at Global Talent Mentoring!

Global Talent Mentoring is an online mentoring program fostering excellence in STEMM for talented youths worldwide. Distinctive in its evidence-based, long-term approach, Global Talent Mentoring bridges geographic and cultural distance to connect the brightest young minds with distinguished researchers, academics, and professionals to form a global pool of talent development.

The mentors are accomplished scientists, engineers, and other practicing STEMM experts (PhD or R&D experience) working in the private and public sectors. **The mentees** are outstanding, hardworking students (starting about age 16) from around the world who are exceptionally motivated to pursue excellence in a specific STEMM domain. Each mentee is matched with a mentor who shares passion and expertise in the same STEMM field. Watch our testimonial videos at www.globaltalentmentoring.org!

Under the leadership of Program Directors Prof. Dr. Heidrun Stoeger and Prof. Drs. Albert Ziegler and their research teams at the University of Regensburg and the University of Erlangen-Nuremberg (Germany), Global Talent Mentoring is available to young people everywhere—free of charge—from all cultural and financial backgrounds. Our partners coordinate nearly 100 countries on five continents.

Why Global Talent Mentoring?

- Guide a passionate youth in your STEMM field during their transformation from promising high-school-aged talent to accomplished early-career expert
- Directly invest in the future of your field and network with like-minded peers from all over the world in our members-only community on our custom-designed platform
- Receive mentor training, collaborate on projects, and participate in live community events
- Give the opportunity of equal access to knowledge by supporting excellent students in STEMM, including those without immediate access to the support they need to develop their talents
- Your participation helps enable talented youths from Bulgaria to participate as mentees

How can I join as a mentor?

We accept new mentors year-round. Please visit www.globaltalentmentoring.org/mentor and submit our Mentor Volunteer Form. For the last question (“How did you learn about us?”), please be sure to select **“Bulgarian Ministry of Education and Science.”**
